This application was filed to correct errors in claim 1. Claim 1 was amended by removing the step of "implanting into an animal or human the matrix at a site where the resulting cell-construct is needed". Deletion of the second implanting step serves to encompass methods wherein the matrix was cultured in vivo as well as in an equivalent method, such as a bioreactor. Claim 1 was directed to a "cell-matrix construct" and not positively limited to heart valve constructs. New claim 20 was added to include language that further defines the matrix, where the matrix includes "struts" or "support" elements, which were not previously claimed.
